

CJ' s Training Camp: Sustainability

Lesson 1

What is Sustainability?

A small green plant with two leaves is growing out of a clear glass lightbulb. The lightbulb is placed on a wooden log. The background is dark and blurred.

What does sustainability mean?

Sustainability is defined as:

The development of natural, social, and economic resources that meets the needs of the present without compromising the ability of future generations to meet their own needs.

The image is a vertical collage of four distinct scenes. From top to bottom: a dense green forest; a white wind turbine on a grassy hill with mountains in the background; a large, diverse crowd of people looking in various directions; and a large blue shipping container ship docked at a port with cranes and other containers visible.

1. What does this mean to you?

2. How would you explain this concept to others?

**Why does
this matter?**
